<p>The Panic of 1857 was a financial panic in the United States caused by the declining international economy and over-expansion of the domestic economy. Because of the interconnectedness of the world economy by the 1850s, the financial crisis that began in late 1857 was the first worldwide economic crisis.^[1]</p>	<p>The Panic of 1893 was a serious economic depression in the United States that began in 1893 and ended in 1897.^[1] It deeply affected every sector of the economy, and produced political upheaval that led to the realigning election of 1896 and the presidency of William McKinley.</p>	<p>The Great Depression was a severe worldwide economic depression that took place mostly during the 1930s, originating in the United States. The timing of the Great Depression varied across nations; in most countries it started with panic in 1929 and lasted until 1941.^[1] It was the longest, deepest, and most widespread depression of the 20th century.^[2] In the 21st century, the Great Depression is commonly used as an example of how far the world's economy can decline.^[3]</p>	<p>The financial crisis of 2007–2008, also known as the global financial crisis and the 2008 financial crisis, is considered by many economists to have been the worst financial crisis and panic since the Great Depression of the 1930s.^{[1][2][3][4]}</p>	 <table border="1"> <thead> <tr> <th>Country</th> <th>National Debt</th> <th>GDP-Gross Domestic Product</th> <th>Public Debt to GDP Ratio</th> <th>External Debt to GDP Ratio</th> </tr> </thead> <tbody> <tr> <td>USA</td> <td>\$20,638,194,020,675</td> <td>\$19,811,849,700,742</td> <td>72.321%</td> <td>97.636%</td> </tr> <tr> <td>China</td> <td>\$2,256,904,848,159</td> <td>\$11,266,876,620,566</td> <td>20.031%</td> <td>13.954%</td> </tr> <tr> <td>Japan</td> <td>\$12,262,693,663,447</td> <td>\$4,947,751,352,757</td> <td>247.84%</td> <td>82.405%</td> </tr> <tr> <td>Germany</td> <td>\$2,268,283,937,087</td> <td>\$3,482,324,089,741</td> <td>65.144%</td> <td>159.97%</td> </tr> <tr> <td>UK</td> <td>\$2,452,569,061,874</td> <td>\$2,631,389,189,501</td> <td>93.204%</td> <td>266.90%</td> </tr> <tr> <td>France</td> <td>\$2,514,049,318,569</td> <td>\$2,468,389,189,503</td> <td>101.84%</td> <td>226.07%</td> </tr> <tr> <td>India</td> <td>\$1,233,850,629,744</td> <td>\$2,271,842,774,239</td> <td>54.310%</td> <td>17.920%</td> </tr> </tbody> </table>	Country	National Debt	GDP-Gross Domestic Product	Public Debt to GDP Ratio	External Debt to GDP Ratio	USA	\$20,638,194,020,675	\$19,811,849,700,742	72.321%	97.636%	China	\$2,256,904,848,159	\$11,266,876,620,566	20.031%	13.954%	Japan	\$12,262,693,663,447	\$4,947,751,352,757	247.84%	82.405%	Germany	\$2,268,283,937,087	\$3,482,324,089,741	65.144%	159.97%	UK	\$2,452,569,061,874	\$2,631,389,189,501	93.204%	266.90%	France	\$2,514,049,318,569	\$2,468,389,189,503	101.84%	226.07%	India	\$1,233,850,629,744	\$2,271,842,774,239	54.310%	17.920%
