In the New Model, all good people in the arena enjoy resuming the restoration of the Constitutional republic FROM JFK's point of interruption, can see for miles and miles, and enjoy Liberty in building out properties and the local means of production, with the capability to sow, nurture, grow, harvest, store, cook, engineer, design, program, automate, construct, process, raise, teach, counsel, hunt, defend, provide, debate, organize, compose, perform, worship, dance, laugh, love, celebrate, and sustain. Members enjoy a career in methods of spontaneous cooperation in the discovery and development of regenerative processes that achieve a well-defined whole.

"There is one revolution tolerable to all men, all societies, all political systems: Revolution by design and invention." -R. Buckminster "Bucky" Fuller, 1968.

The TRUE measure of greatness of the individual, organization, society, and world IS NOT a focus on elevating war sales and margin, but rather a focus on elevating the marginalized into a world that works for all of creation!

A core belief of transcendentalism is in the inherent goodness of people and nature. Adherents believe that society and its institutions have corrupted the purity of the individual and nature, and they have faith that people are at their best when truly "self-reliant" and independent.

"Confident that with YOUR help, man will be what he was born to be: free and independent."

"Does the INDIVIDUAL have the courage to really go along with the TRUTH?"

"One person can make a difference, and everyone should try."

"It is a crime for any citizen to shrink from controversy."

"When TRUTH represents an existential threat, then censorship is deployed."

"Those who make peaceful revolution impossible will make violent revolution inevitable."

John F. Kennedy.

First Clear Evidence That COVID Attacks Brain Cells

This new study from Akiko Iwasaki, PhD and colleagues at Yale University offers the first clear evidence that COVID can invade brain cells 1) 40-60% of hospitalized COVID patients experience neurological complications including nerve damage and stroke 2) this study suggests that COVID in the brain may be more lethal than the respiratory infection caused by COVID 3) COVID hijacks brain cells to make copies of itself then

exploits the brain cells' machinery to multiply 4) then COVID chokes off oxygen to adjacent brain cells causing them to die 5) a few days into the infection there is a dramatic decrease the number of synapses (the connections between neurons in the brain) 6) the researchers didn't find any evidence of an immune response to remedy this problem. It's a silent infection with evasion mechanisms 7) some people may be susceptible because of their genetic background or high viral load.

1) BERG is clinical stage biotech

Biological Insights: Increased Incidence of COVID in Ethnic Groups

company that uses AI to research diseases and develop innovative treatments 2) today Berg announced the results of a COVID-19 study 3) the study was a collaboration with scientists from University of Oxford and Virginia Commonwealth University 3) the objective was to describe a biological framework associating ethnic prevalence of ACE deletion polymorphism to COVID-19 comorbidities 4) the

study identified a genetic factor that might account in part for the prevalence of COVID in African Americans 5) highlights the increased frequency of an ACE deletion polymorphism in the African American population 6) this genetic aberration has a known association with risk of greater susceptibility to lung and kidney dysfunction 7) ACE DD polymorphism is also associated with hypertension, acute respiratory distress and diabetic nephropathy, all considered high risk for severe COVID 8) the study provides strong rationale for use use of existing ACE inhibitors and ARBs to manage serious clinical symptoms

Supercomputer Analyzes 2.5 Billion Genetic COVID Combos

Researchers used Summit Supercomputer to analyze 2.5 billion genetic combinations from COVID; then they made the Bradykinin Hypothesis 1) it took Summit 1 week to run the numbers, this would take workstation clusters many months 2) COVID causes levels of ACE in lung cells to decrease while the levels of ACE2 increases 3) this increases the level of bradykinin molecules in the cells 4) as the

production of hyaluronic acid increases, the enzymes that could degrade it decreases 5) hyaluronic acid absorbs >1,000 times its weight in water and forms a gel 6) leakage of fluid into the lungs combined with excess hyaluronic acid results in a Jello-like substance in the lungs 7) this prevents oxygen uptake and carbon dioxide is released in the lungs 8) bradykinin storm affects major organs that are regulated by angiotensin derivatives 9) COVID tricks the body into upregulating ACE2 receptors in places where they're usually expressed at low levels 10) this includes kidney, heart, brain, muscles, lungs 11) suggests 10 FDA approved drugs as potential treatments including vitamin D, icatibant, berinert, cinryze, haegarda, hymecromone, timbetasin, ecallantide, danazol, stanasolol
