

Central banks shoveling digital fiat currency...into the REPO markets since Tuesday, September 24, 2019, has yielded GREAT stock market liquidity, induced corporations to acquire record cheap debt through bond issuance, buyback their stocks with bond sale proceeds, layoff workers, subsequently increase published earnings per share, and propel stock market indexes to new record highs. These money changer parlor tricks have yielded accelerating record world debt, record disparity, and record civil unrest.

This WILL NOT end well for the multitudes of unprepared...nor for the elites.

Enhancing shareholder value...when done at the expense of human and ecological value often proves fatal.

And exposing truth often proves just as fatal.

Constitutionalists ARE the lifelines.

A core belief of transcendentalism is in the inherent goodness of people and nature. Adherents believe that society and its institutions have corrupted the purity of the individual, and they have faith that people are at their best when truly "self-reliant" and independent.

"Confident that with YOUR help, man will be what he was born to be: free and independent."

"Does the INDIVIDUAL have the courage to really go along with the TRUTH?"

"It is a crime for any citizen to shrink from controversy."

"When TRUTH represents an existential threat, then censorship is deployed."

"Those who make peaceful revolution impossible will make violent revolution inevitable."
