

The historical method to accelerate market growth and economic activity is indebted central bank funding of unanimous Congressional spending on conventional WARFARE and the means of destruction. In addition to providing accelerated private-sector wage-gains and defense contractor profits, this approach successfully inducts the economically disadvantaged into the armed services, and provides for a thinning of that portion of the population identified as "expendable".

However, this time IS NOT conventional, by design...

Back AT the Garden!

A core belief of transcendentalism is in the inherent goodness of people and nature. Adherents believe that society and its institutions have corrupted the purity of the individual, and they have faith that people are at their best when truly "self-reliant" and independent.

"Confident that with YOUR help, man will be what he was born to be: free and independent."

"Does the INDIVIDUAL have the courage to really go along with the TRUTH?"

Zero-Bound

By CORY MITCHELL | Updated Jul 9, 2019

What is Zero-Bound?

Zero-bound is an expansionary monetary policy tool where a central bank lowers short-term interest rates to zero, if needed, to stimulate the economy. A central bank that is forced to enact this policy must also pursue other, often unconventional, methods of stimulus to resuscitate the economy.

Liquidity Trap

By CORY MITCHELL | Reviewed By MARGUERITA CHENG | Updated Apr 6, 2020

What Is a Liquidity Trap?

A liquidity trap is a contradictory economic situation in which interest rates are very low and savings rates are high, rendering monetary policy ineffective. First described by economist John Maynard Keynes, during a liquidity trap, consumers choose to avoid bonds and keep their funds in cash savings because of the prevailing belief that interest rates could soon rise (which would push bond prices down). Because bonds have an inverse relationship to interest rates, many consumers do not want to hold an asset with a price that is expected to decline. At the same time, central bank efforts to spur economic activity are hampered as they are unable to lower interest rates further to incentivize investors and consumers.
