NO ARMY can stop an idea whose time has come.

A core belief of transcendentalism is in the inherent goodness of people and nature. Adherents believe that society and its institutions have corrupted the purity of the individual, and they have faith that people are at their best when truly "self-reliant" and independent.

"Confident that with YOUR help, man will be what he was born to be: free and independent."

"Does the INDIVIDUAL have the courage to really go along with the TRUTH?"

"One person can make a difference, and everyone should try."

"It is a crime for any citizen to shrink from controversy."

"When TRUTH represents an existential threat, then censorship is deployed."

"Those who make peaceful revolution impossible will make violent revolution inevitable."

Surveillance creep Jeff Bezos and his evil Amazon monopoly:

When he wasn't busy sending nude photos of himself to his mistress, Jeff Bezos of Amazon spent the year 2019 constructing a global surveillance grid using his "Alexa" line of spy devices to develop "an ever-more invasive, militarized and sprawling surveillance state," to quote the words of *The Intercept's* Glenn Greenwald.

As the newest owner of Whole Foods Market, Bezos also failed to follow through with the company's former promise to label all genetically modified organisms (GMOs) in its stores by 2018 – and, in fact, may have been instrumental in stopping labeling from happening.
