

JEDI: Joint Enterprise Defense Infrastructure.

.....starts with one person, one relationship, one family, one neighbor, one neighborhood, one village, one city, one state, one nation, at a time...simultaneously.

The controversy involves a plan to move all of the Defense Department's data-classified and unclassified-on to the cloud. The information is currently strewn across some 400 centers, and the Pentagon's top brass believes that consolidating it into one cloud-based system, the way the CIA did in 2013, will make it more secure and accessible. That's why, on July 26, the Defense Department issued a request for proposals called JEDI, short for Joint Enterprise Defense Infrastructure. Whoever winds up landing the winner-take-all contract will be awarded \$10 billion—instantly becoming one of America's biggest federal contractors.
